

Drylac<sup>®</sup>  
POWDER COATINGS

## Series 38

AAMA 2604 super durable powder coatings | Volume 2

# Super durable powder coatings for exterior and interior architectural applications

This color chart features a wide selection of **TIGER Drylac® Series 38** high performance powder coatings intended for architectural applications such as metal façades, steel constructions, stadium seating, railings and residential window and door frames.

**TIGER Drylac® Series 38** is also suitable for industrial applications where a high performance weather resistance is required such as agricultural equipment, external ship components, military equipment, communication towers, playground equipment, patio furniture and garden equipment.

## AAMA 2604 compliance

**TIGER Drylac® Series 38** complies with the American Architectural Manufacturing Association's specification AAMA 2604\*. It imparts excellent weather and UV resistance. Based on 5-year Florida exposure, **TIGER Drylac® Series 38** exhibits  $\leq \Delta E$  5.0 (Hunter) color change and  $> 30\%$  gloss retention.

\* AAMA 2604 compliance is dependent upon the color and or effect.

## TIGER Shield® system

To achieve excellent corrosion resistance in marine environments and coastal regions where objects coated are directly exposed to salt and fog conditions, it is recommended to use **TIGER Shield®** system.

**TIGER Shield®** is a two-coat system consisting of a corrosion protective primer as base coat and an opaque weather resistant **TIGER Drylac®** powder coating as top coat.

**Dryprotector**, **TIGER Drylac® 69/70000**, **Zinc-Rich Primer**, **TIGER Drylac® 69/90500 (69/90701 Canada only)** and zinc-free **OGF Primer**, **TIGER Drylac® 09/73841** are recommended primers to achieve an optimum non-porous film. For additional information on the application of **TIGER Shield®** system, it is recommended to refer to the latest edition of the Product Data Sheets of these primers.

## Standard BLM colors

The Bureau of Land Management Standard Environmental Colors (BLM) were developed by the American government to minimize adverse visual contrast with the background landscape and ensure proper color selection for a facility.

BLM colors in **TIGER Drylac® Series 38** are weather and UV resistant and can withstand long exposure to harsh environments.

Color swatches featured in this color chart have been matched to color standards at a 60-degree visual angle under a D65 Daylight primary source. Gloss level on metallic and fine textured swatches cannot be accurately measured.

The swatches are to be considered as an indication only. In practice, discrepancy between the color swatch and the actual powder coating may arise. This is due to paper and ink limitations, the influence of light and heat during the color chart production, as well as gloss level, substrate, surface variations, binder systems and pigments, coating thickness and cure oven conditions used during application.

For an accurate color and finish assessment, it is recommended to obtain a powder coated sample panel from **TIGER Drylac®**.

# Drylac®

**TIGER Drylac® Series 38** is also available in a smooth glossy finish (gloss level 85±5) in 107 RAL colors

For visual inspection of RAL colors, please refer to the latest edition of “RAL colors, Interior and exterior applications” color chart from **TIGER Drylac®**.

For an accurate RAL color and finish assessment, it is recommended to obtain a powder coated sample panel from **TIGER Drylac®**.

To eliminate adverse inaccuracies related to color and finish during the specification process, it is highly recommended to indicate the **TIGER Drylac®** product ID along with the RAL number.
